Course Description

This course provides students of all disciplines a broad overview of contemporary organizational management theory and best practices as they relate to the four primary functions of managers and leaders, namely: planning, organizing, leading, and controlling. We will explore organizational behavior, planning and types of plans, managing in global context, decision-making styles and approaches, leadership vs management, organizational design and structure, characteristics of effective work teams, change management and control systems, communication process, and the importance of ethics, law, stakeholder management and social responsibility in today's fast-paced for-profit and non-profit organizations.

Course Intended Learning Outcomes

On successful completion of this course, students should be able to:

1. Explain the role of management in organizations, functions, and required skills.
2. Describe management's role in encouraging ethical behavior and social responsibility.
3. Explain the decisions making process, different decision-making styles and how biases can affect decision-making.
4. Demonstrate the importance of planning, types of plans, and goal setting theories and methods.
5. Understand six elements of organizational design and structure.
6. Compare and contrast early theories of leadership with contemporary and modern approaches to leadership.
7. Discuss the controlling process, types of control, and how to improve efficiency of performance management in an organizational context.
8. Develop analytical skills as well as understanding of management concepts through the application of an in-depth managerial analysis for a given business organization.

Required Course Materials

1. Reference Textbooks: The following main textbook is required for this course.

Textbook	Management, Global Edition, 15/E, Stephen P. Robbins, Mary Coulter, ISBN: 9781292374468, Pearson, 2021.

2. University portal, course coordinator email, announcements, homework assignments, and lecture notes. Check it frequently for updates. I will also periodically post new articles, links or research papers pertinent to our class discussions to the University portal.

Presentations	☐	Case Study	☐

- Assessment Strategy & Grade Distribution

The assessment has been designed to test the achievement of the course's learning outcomes and it requires students to think critically and apply the knowledge gained during the course. Accordingly, the course is assessed by the following components:

Course Requirement	Points
Assessment (1)	10
Assessment (2) – Mid Term Exam	20
Assessment (3)	30
Assessment (4) – Final Exam	40
Total Points	100 points

Important Note:

- Final Exam weight should not exceed 40% of total Assessments.

Below is the detailed guidance for the required assessment items:

1- Assessment (1): 10 Points

Please provide details

2- Assessment (2): 20 Points

Please provide details

3- Assessment (3): 30 Points

Please provide details

4- Assessment (4): 40 Points

Please provide details

- ESLSCA University Grading Scheme

Letter Grade	GPA	Percent	Description
A	4.0	90-100	Superior performance
A-	3.7	85-89	Great performance
B+	3.3	80-84	Just above good performance
B	3.0	75-79	Good performance
B-	2.7	70-74	Just below good performance
C+	2.3	65-69	Fair performance
C	2.0	60-64	Acceptable performance
F	0.0	0-59	Failure

- Class Policies

1. Class Participation:

- Class participation is a principal component of all coursework in the program. Course grades reflect the quality of students' academic performance as a whole, which normally includes regular participation in the total class experience and are evaluated accordingly.
- You are expected to be thoroughly prepared at each class meeting (e.g., required readings). To reinforce this expectation, I will often randomly select a class member to comment on an issue.

2. Attendance Policy:

ESLSCA University expects students to attend all regularly-scheduled classes for instruction and examination. When a student is compelled for any reason to be absent from class, the student should immediately convey the reason for the absence directly with supported documents to the course coordinator and to academic affairs and finally to be approved by the course instructor. The student is responsible for all material presented in class and for all announcements and assignments.

The decision to permit students to make up work that is required in any missed class resides with the course instructor. Students are required to attend a minimum of 75 % of all course classes, students who exceed the permitted percentage of absence (25% of all course classes) will be administratively forced withdrawn (**FW**) from the course; a grade of **F** due to **FW** may be assigned when students fail to attend a minimum of 75% of the total course classes. Students who have not attended classes but still appear on the class rosters are considered No Show students.

3. Classroom Conduct:

- Punctuality:
  Lateness is disrespectful and disruptive. Chronic lateness will not be tolerated. Please be punctual in class and for your group meetings.
- Cellphones and Electronic Devices:
  Cellphones are not permitted in class; please turn off your cellphones in class.

4. Academic Integrity Policy:

As part of our commitment to maintaining a culture of academic excellence and integrity, this CDF outlines the University's policies regarding academic dishonesty. All students are expected to uphold the highest standards of academic honesty and adhere to the following principles. Any violation of the Academic Integrity Policy will be taken seriously and may result in disciplinary action. Consequences for academic dishonesty may include, but are not limited to, a failing grade on the assignment or examination, a failing grade for the course, academic probation, or even expulsion from the University.

A. Plagiarism:

Plagiarism is a serious offense and goes against the core principles of learning, research, and education in general. Plagiarism includes, but is not limited to, presenting someone else's work, ideas, or intellectual property as one's own without proper attribution. You are required to properly cite and reference all sources used in your academic work, including written assignments, research papers, projects, and presentations. When in doubt, always consult your instructors to ensure you are adhering to the appropriate citation guidelines.

B. Use of Artificial Intelligence (AI):

AI (artificial intelligence) resources such as ChatGPT and others can be useful in a number of ways, but it can also be abused. However, you are required to acknowledge the use of AI in any work you submit for class. Text directly copied from AI sites must be treated as any other direct quote and properly cited. Other uses of AI must be clearly described at the end of your assignment. The following are some guidelines for what not to do when using AI in your assignments and for plagiarism detection:

I. Do not rely solely on AI tools to complete assignments. It is important to understand the material and complete assignments on your own, using AI tools as a supplement rather than a replacement for your own work. If any assignment is done through AI, it will be considered as a violation of academic integrity.

II. Do not use AI tools to plagiarize*. Using AI to generate or modify content to evade plagiarism detection is unethical and violates academic integrity.

III. Do not assume that AI responses are always correct. It has been noted that AI can generate fake results.

C. Collaboration:

Collaboration is encouraged but must be within the guidelines set by the instructor. In group projects or assignments, students must clearly indicate their contributions and give appropriate credit to their teammates. Unauthorized collaboration that results in identical or substantially similar work for individual assessments is not permissible.

D. Cheating on an examination or quiz:

Cheating during examinations or quizzes is strictly prohibited. This includes, but is not limited to, using unauthorized materials, communicating with others, copying from someone else's work, or using electronic devices for prohibited purposes during the assessment.

E. Falsification of data:

Falsifying research data, experimental results, or any academic information is a severe breach of academic integrity. Any form of fabrication, misrepresentation, or manipulation of data is strictly prohibited.

- Overview of Course Schedule:

Week	Topics	Assignments & Readings
1	Introduction to Management: - Managers and Management. - How managers are different from non-managerial employees? - What is the management role? - What skills do managers need?	
2	Managing Social Responsibility and Ethics: - What it means to be socially responsible. - Factors that lead to ethical and unethical behavior. - Management's role in encouraging ethical behavior. - Current social responsibility and ethics issues.
